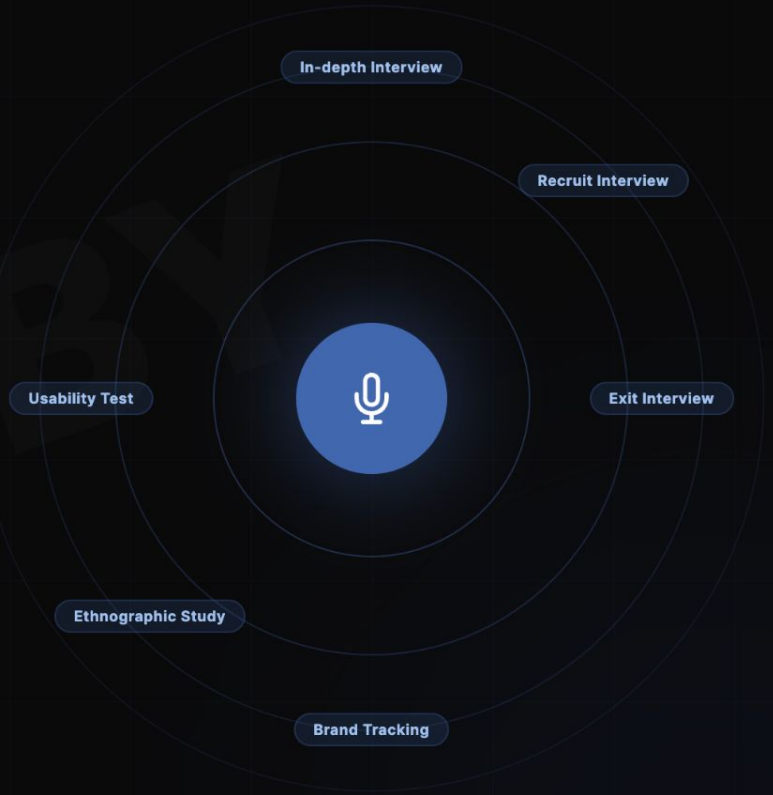
Proby

⭐ AI-Powered Qualitative Research

The most sophisticated AI interview agent

Proby conducts in-depth qualitative interviews at scale — with the depth, nuance, and probing quality of a senior researcher.

chris@proby.io · www.proby.io



THE PROBLEM

Traditional user research doesn't scale with your ambition.

Deep qualitative insights have always been bottlenecked by time, cost, and researcher availability.

Weeks, not days

Recruitment alone takes 1–2 weeks. Full research cycles can stretch to months. Decisions wait.

High cost per insight

Agency research runs ₩5M–₩30M per project. Budgets constrain the depth and frequency of research.

Hard to recruit & scale

Finding the right participants is exhausting. Scaling to 100 interviews requires proportional human effort.

OUR SOLUTION

Proby is an AI agent that interviews like a senior researcher.

Built on years of qualitative research expertise, Proby asks intelligent follow-up questions, probes deeply into motivations, and extracts insights that matter — all at scale.

- Launch an interview study in under 1 day
- Run 100+ simultaneous 1-on-1 interviews
- Receive a full analysis report within 3 days
- Human-like conversation rated 7/10 by participants

Adaptive Probing

Dynamically follows up on unexpected responses like a skilled moderator.

3-Day Turnaround

Brief → setup → interviews → report. End-to-end in days, not weeks.

AI-Powered Analysis

Themes, verbatims, and actionable insights automatically synthesized.

Multi-Language

Conducts interviews in Korean, English, and Japanese with full fluency.

WHAT WE DO

Interviews powered by Proby

Recruit Interview

Assess candidate fit, motivations, and culture alignment at scale before final rounds.

Driver Exit | Key Talent Study

Exit Interview

Understand why customers or employees leave — at the exact moment of churn.

Ride-Share Churn | Service Exit Study

In-depth Interview

Explore beliefs, motivations, and behaviors through structured deep-dive conversations.

MZ Finance Study | AI Attitude Study

Usability Test

Evaluate UX friction points through task-based sessions with real users.

Fashion App UX | Public Service UX

Brand Awareness Tracking

Monitor brand perception and competitive positioning over time with consistent data.

F&B Brand Study | Banking Tracking

Ethnographic Research

Deep contextual investigation into consumer behavior patterns and latent needs.

Field Observation | Behavior Study

OUR PROCESS

Making user research easy

CLIENT

Share Brief

Research goals, target audience, and key questions to answer.

Set up Agent

Configure interview script, persona, and flow. Ready in ~1 day.

PROBY

Run Interviews

AI conducts 1-on-1 interviews at scale. 1–2 days. Panel optional.

PROBY

Analysis & Report

Key insights extracted, full report prepared. ~1 day.

CLIENT

Receive Report

Actionable insights and recommendations, ready to act on.

End-to-end delivery in as little as 3 days

HUMAN-LIKENESS BENCHMARK

Participants can't tell the difference.

We ran a blind benchmark study where participants interviewed with both human and AI researchers. Proby scored an average of **7.2 / 10** human-likeness rating.

AI Similarity Score **7.2 / 10**

Clearly AI (0) — Indistinguishable (10)

100% of participants willing to re-participate

WHAT PARTICIPANTS SAID ABOUT PROBY

> "The questions were surprisingly nuanced. It really felt like talking to someone who understood the context."

> "I wasn't sure if it was human or not — the follow-up questions were that natural."

> "I would participate in this kind of interview again. It was comfortable and didn't feel rushed."
